

DAY-1 FORMATTING

The image displays two screenshots of a JupyterLab notebook interface, demonstrating various Markdown formatting capabilities. The notebook is titled "formatting.ipynb" and shows the "Kernel" tab selected.

Top Screenshot: This view shows the initial state of the notebook with several heading cells. The first cell is a "HEADING 1" (h1), followed by "HEADING 2" (h2), "HEADING 3" (h3), "HEADING 4" (h4), "HEADING 5" (h5), and "HEADING 6" (h6). Below these are three text cells: the first contains "HI" in a large, bold, italicized font; the second contains "HI" in a smaller, italicized font; and the third contains "HI" in a bold font. A bulleted list follows, with items "PAVI", "PAPPU", and "PANDA".

Bottom Screenshot: This view shows the notebook after executing several code cells. The first cell contains a bulleted list with items "HI", "HELLO", "WELCOME", and "HOME". The second cell contains a numbered list with items "1. MUGI" and "2. PAVIN". The third cell contains a code cell with the following Python code:

```
"""print("hi")"""  
print()
```

The output of this cell is a horizontal line. The fourth cell contains a code cell with the following Python code:

```
name | course | mark |  
  
name mark course  
pavi 100 ai8ids
```

The output of this cell is a table with three columns: "name", "mark", and "course". The table has one row of data: "pavi", "100", and "ai8ids". The fifth cell contains a code cell with the following Python code:

```
time sum(range(100))
```

The output of this cell is "CPU times: total: 0 ns" and "Wall time: 951 µs". The sixth cell contains a code cell with the following Python code:

```
print()
```

The output of this cell is "4950". The seventh cell contains a code cell with the following Python code:

```
time
```

The output of this cell is "0.000100".
